Dear Mr. McCann:

Subject: Update on Retirement of the Rest of the BCLDP Environmental Procedures and the Environmental Plan

Mike, per your request and for your informational purposes I am writing this letter to inform the NRC of the retirement of the rest of the BCLDP Environmental Procedures/Plan:

- **DD-98-01 “West Jefferson Site Environmental Monitoring Plan for BCLDP”**
- **EM-SP-002 “ Collection of Environmental Water and Liquid Effluent Samples for Radiological Analysis”**
- **EM-SP-009 “ Collection of Environmental Groundwater Samples”**

These procedures and plan were retired on November 3, 2006 based on the facts that there is no longer any source term on site to monitor, Battelle has submitted for license termination to the NRC, and that Battelle has completed its supplementary field work associated with investigation of the three groundwater bearing units on site.

The BCLDP QA procedure process was applied to the retirement of these procedures/plan including the review prescribed in HP-AP-36.0 “Control of Revisions to Radiation Protection Program Documents.”

If you have any questions or comments please do not hesitate to call me at 614-424-4098.

Sincerely,

Joe Jacobsen BCLDP RSO
