Below are our three comments on the Environmental Assessment for the termination of the Naval Underseas Warfare Center permit.

Section II last sentence of first paragraph. We would suggest that the wording be changed to read "From 1976-1987, the same licensed material was used at the site under NRC License No. 46-09611-03." When we read this sentence, we wondered what other material was used at the site (Later it is made clear Kr-85 was the only material), but it would be good to be clear here as well.

Page 3 first paragraph under Environmental Impacts of the Proposed Action They write that the "Licensee conducted decontamination activities as necessary" This is odd as previously they say Kr-85 is a noble gas and "no contamination remains." This is true. We wondered what decon they could do.

Under Agencies and Persons consulted, change "Division" to "Office"
