Dr. Dale E. Klein
Chairman,
U.S. Nuclear Regulatory Commission (USNRC)

Beijing, 8 October 2006

Dear Dr. Dale E. Klein,

I would like first to express my sincere thanks for your kind invitation and hospitality to my first visit to USNRC in July when you just took the important responsibility as the Chairman of USNRC. It was truly a fruitful discussion for us since the valuable nuclear safety information was exchanged between the two countries. Further, I was so glad that we could share the same view on enhancing the Nuclear Safety Regulation. As the important effect of this bilateral discussion, I was also glad that USNRC and NNSA agreed to establish the Steering Committee on Nuclear Safety Cooperation between USNRC and NNSA.

Based on our previous discussion, now I am very happy to confirm with you that:

Mr. XU Qinghua, Director General, Department of International Cooperation, NNSA/SEPA, to be the Chair of the Steering Committee as Chinese side.

Mr. WANG JUN, Deputy Director General, Department of Nuclear Safety, NNSA/SEPA, to be the Vice Chair of the Steering Committee as Chinese side.

Dr. JIANG Wei, Director, Division of International Cooperation on Nuclear Safety, Department of International Cooperation, NNSA /SEPA, to be the Contact Person of the Steering Committee as Chinese side.

NNSA believes that the establishment of the Steering Committee will be very helpful for the information exchange of nuclear safety between U.S. and China, and be beneficial for the healthy development and safety of nuclear power plants in our two countries.

In addition, it was my pleasure to meet Commissioner Gregory B. Jaczko in September in Beijing. I really enjoyed the detailed discussion with him on several cooperative programmes between USNRC and NNSA.

Finally, I would like to take this opportunity to express my thanks again for your strong support and continuous cooperation with NNSA, and also extend again my invitation to you to visit China as your convenient time.

Sincerely yours,

Wang Yuqing

Administrator
National Nuclear Safety Administration (NNSA)
