 King of Prussia, PA 19406

Dear Mr. Costello:

The following information is provided to your organization as related to the June 17, 1985 telephone conversation between Mr. Joseph M. Santarsiero, this command, and Mr. Frank Costello, your organization, subject: Potential loss of one each AN/UDM-6 Radiac Calibrator Set, Serial Number A1038. The calibrator is authorized under NRC License No. SNM-1900.

The AN/UDM-6 Radiac Calibrator Set identified above, containing 23 micrograms of Pu-239, was reported potentially missing in transit between the 2nd Maintenance Company, Camp Carroll, Korea and Lexington-Blue Grass Depot Activity (LBDA), Lexington, KY. Verification of receipt has been provided this office by LBDA.

To preclude such temporary accountability loss for future shipments, this command has requested that transport of the AN/UDM-6 Radiac Calibrator Set be made by commercial air transport in accordance with applicable US Department of Transportation regulations and not via waterways. This should provide a more direct means of transport and assure better traceability should loss of accountability reoccur in future shipments.

Please contact this office at (201) 544-4427 if more information is required regarding this matter.

Sincerely,

Steve A. Howe
