November 14, 2006

Eugene S. Grecheck
Vice President – Nuclear Support Services
Dominion Nuclear North Anna, LLC
5000 Dominion Boulevard
Glen Allen, VA 23060

Dear Mr. Grecheck:

The Nuclear Regulatory Commission (“NRC”) is in receipt of Dominion Nuclear North Anna, LLC’s (“Dominion”) November 10, 2006 supplement to its early site permit (“ESP”) application for the North Anna ESP site. In that supplement, Dominion adds the following commitment to its ESP application, and requests that it be included as a permit condition:

Dominion Nuclear North Anna, LLC (Dominion) shall conduct a comprehensive Instream Flow Incremental Methodology (IFIM) study, designed and monitored in cooperation and consultation with the Virginia Department of Game and Inland Fisheries (VDGIF) and the Virginia Department of Environmental Quality (VDEQ), to address potential impacts of the proposed Units 3 and 4 upon the fishes and other aquatic resources of Lake Anna and downstream waters. Development of the Scope-Of-Work for the IFIM study shall begin in 2007, and the IFIM study shall be completed prior to issuance of a combined construction and operating license (COL) for this project. Dominion agrees to consult with VDGIF and VDEQ regarding analysis and interpretation of the results of that study, and to abide by surface water management, release, and instream flow conditions prescribed by VDGIF and VDEQ upon review of the completed IFIM study, and implemented through appropriate state or federal permits or licenses.

The NRC herein agrees to include this proposed condition as an enforceable permit condition, should the agency approve the North Anna ESP application and ultimately issue a permit.

Should you have any further questions on this matter, please contact me at (301) 415-1696.

Sincerely,

/RA/

Robert M. Weisman
Counsel for NRC Staff
