ADJUDICATIONS STAFF

Docket No. 52-007-ESP

As a citizen of Illinois, I am writing to express my support for Exelon's early site permit application to construct an additional reactor at the Clinton Power Station. Exelon has demonstrated a commitment to nuclear power in Illinois and strives for excellence in its operations. The company's financial well-being argues for their staying power in the industry and their continued efforts to resolve the issue of nuclear waste management seem to be both fiscally and technically responsible. As I understand it, their decision to construct another reactor hinges largely on this issue as it develops over the coming years. I applaud the long-view of their position. The demonstrated reliability of nuclear generation as a source of pollution-free and oil-free electricity is a legacy that we should bequeath to our children and our economy. I endorse their application for an early site permit.
