United States Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

Dear Sir:

Subject: Salem Generating Station Units 1 and 2
Docket Nos. 50-272 and 50-311
License Change Request S06-02
Request for Amendment to Technical Specifications to Revise
Topical Report References in Technical Specification 6.9.1.9,
Core Operating Limits Report

PSEG Nuclear LLC submitted the proposed change to the Salem Technical Specifications by letter to the NRC dated September 26, 2006. The proposed amendment would delete the revision level from topical report references in Technical Specification 6.9.1.9, but would require the referencing of the NRC approved revision number used in the Core Operating Limits Report.

The BNE has no comments on the proposed change. If you need to discuss this subject further, please contact Elliot Rosenfeld at (609) 984-7548.

Sincerely,

Kent W. Tosch, Manager
Bureau of Nuclear Engineering
