Docket No. 030-1317

Based on the results of an NRC inspection conducted on March 25-26, 1980, it appears the one of your activities was not conducted in full compliance with the conditions of your license as indicated below.

Condition 23 of your license requires that you possess and use licensed material in accordance with the statements, representations and procedures contained in your application dated June 18, 1974.

Annex A of the Health Physics Regulations entitled, "Authorization to Use Radioactive Material," included in your application describes a detailed procedure for approval of an authorization to use radioactive material.

Contrary to the requirements of this procedure, during January 1980, an iodination involving Iodine-125 was performed in Nuclear Medicine without the review and approval of the Health Physics Section or the WRAMC Radioisotope Committee.

This is an infraction.
