Secretary

Nader Mamish, Deputy Director
Division of Preparedness and Emergency Response
Office of Nuclear Security and Incident Response
U.S. Nuclear Regulatory Commission
Washington DC 20555-0001

FAX TO: 301-415-2968

Dear Mr. Mamish:

We would like to request sixteen thousand (16,000) 65 mg potassium iodide (KI) tablets for the general public in Hancock County, West Virginia within the 10 mile EPZ of Beaver Valley Power Station (with a shelf life of at least 6 years). This request is made in response to the letter dated October 26, 2006 from Roy Zimmerman, Director of the NRC Office of Nuclear Security and Incident Response to all states in accordance with a staff requirements memo 9/6/06 (ML06240522). The current stockpile of potassium iodide in the EPZ, includes previous KI tablets (65 mg) received which will expire in April 2007.

The state contact person authorized to receive the shipment, and the 'ship to' address is myself, Dan Hill, NRC State Liaison Officer, at the address below. Please contact me if you have any questions by calling (304) 558-6772.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Hill".

Dan Hill, Chief
Radiological Health Program
WV-NRC State Liaison Officer
Radiation, Toxics and Indoor Air Division

November 8, 2006

Dear Dan,

The estimated number of 65 mg. KI tablets need for Hancock County has been determined to be approximately 16,000. If you have any questions please feel free to contact me at the office.

Sincerely,

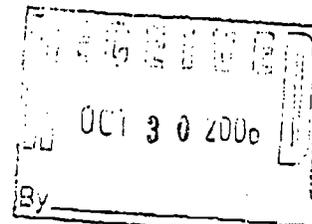

John P. Jones, Director

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

October 26, 2006

Dan Hill, Chief
Radiological Health Program
Office of Environmental Health Services
DHHR Bureau for Public Health
Capitol & Washington Streets, 1 Davis Sq., Suite 200
Charleston, WV 25301-1798

Dear Mr. Hill:

As you know, the U.S. Nuclear Regulatory Commission (NRC) amended its emergency planning regulations in 2001 to require that States consider the prophylactic use of potassium iodide (KI) as a protective measure for the general public in the plume exposure pathway Emergency Planning Zone (EPZ) as a supplement to sheltering and evacuation. To facilitate the implementation of this rule change in 2001, the NRC provided an initial supply of KI tablets to requesting States beginning in calendar year 2002.

In accordance with Commission direction in a Staff Requirements Memorandum dated September 6, 2006 (ML06240522), the NRC, on a one-time basis, will re-supply the existing State stockpiles of 130 mg and/or 65 mg tablets as requested. The shelf life for the 130 mg tablets is 7 years and is 6 years for the 65 mg tablets.

301-415-8003
301-415-1086

To replace existing stockpiles, please provide your written request to Nader Mamish, Deputy Director, Division of Preparedness and Response, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001. Requests for replacement KI tablets must be received by April 30, 2007. You may also fax your request to (301) 415-2968.

Your letter of request must provide the following information: 1) the number of 130 mg and/or 65 mg tablets requested; 2) the State contact person authorized to receive the KI; and 3) the "Ship to" address for KI delivery. Upon receipt of this information, the NRC will validate the data and make arrangements for NRC's contractor to ship the KI directly to your designated contact/ address. The NRC will supply two KI tablets for each person in the 10-mile EPZ(s).

The following information is enclosed for your consideration and use: 1) Guidance – Potassium Iodide as a Thyroid Blocking Agent in Radiation Emergencies; 2) FEDERAL REGISTER NOTICE entitled, "Consideration of Potassium Iodide in Emergency Plans" final rule dated January 19, 2001; 3) NRC Disclaimer; and 4) Staff Requirements – SECY-06-0142 – Options and Recommendations for Replenishing Expired Potassium Iodide (KI) dated September 6, 2006. Additional information about NRC's KI policy can be found on NRC's web site at: <http://www.nrc.gov/what-we-do-emerg-preparedness/protect-public/potassium-iodide.html>.

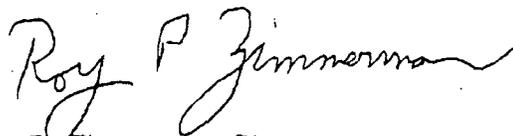

D. Hill

If you have any questions about the purchase of KI or require assistance in this matter, please contact Patricia Milligan, Division of Preparedness and Response, Office of Nuclear Security and Incident Response, by telephone at 301-415-2223 or by email at pxm@nrc.gov.

Thank you for your consideration of this important issue.

Sincerely,

Roy P. Zimmerman, Director
Office of Nuclear Security and Incident Response

Small Oil Company Names Halliburton as President

We have staked our entire way of life on a non-renewable resource that may be largely exhausted within the next 30 years. Coupled with rising problems in the Middle East, keeping the flow of oil constant is becoming more and more difficult. That is why Cole Halliburton became President of Allied Energy (stock symbol AGGI), an independent energy development firm primarily engaged in the syndication, exploration, development, and production of oil and natural gas in the continental United States.

As the fuel of choice to meet the growing demand for a clean-burning domestically produced fuel, the Company firmly believes its natural gas exploration strategy should provide substantial growth to the company **for the years to come.**

Allied Energy Group understands the importance of developing strategic industry alliances and/or partnerships with leading companies throughout the oil and gas industry. Through realizing the area and industry expertise of its strategic industry partners, the Company brings a higher standard of performance to each and every project. As the grandson to one of the founders of Halliburton Services, Inc., Mr. Halliburton serves as President and CEO of Halliburton Operating Company with offices located in Dallas, Texas.

Mr. Halliburton is a Certified Public Accountant (CPA) and Attorney at Law

registered with the State of Texas. Mr. Halliburton received a Bachelor of Business Administration in Accounting from Texas A&M University and a Bachelor of Art in Psychology from the University of Texas at Austin in 1976.

Mr. Halliburton received his Juris Doctor from the Southern Methodist University School of Law in 1980. As an owner/operator of oil and gas properties for over the last 20 years, Mr. Halliburton has participated in over 100 wells in the East Texas Basin and Gulf Coast areas of Texas.

Mr. Halliburton's vast experience in all facets of the oil and gas industry as well as his profound understanding of the legal system with respect to our industry is a critical part of the Company's successful exploration strategy.

Allied Energy has been a hot topic in the news as of late, and will even be featured on the **Winners Circle**—which broadcasts on MSNBC with NFL legend and host Terry Bradshaw. The series was created to highlight corporate success stories from around the country, and is committed to finding stories that **reflect the perseverance and determination required for business leaders to succeed in extraordinary times.**

These are extraordinary times—Times that require looking toward our future and creating a healthy home for our children, and our children's children. The time to research AGGI is now! Because the company is making huge strides in the oil and gas field!
