Re: The Relicensing of Oyster Creek (NJ) Nuclear Plant

Dear Mr. President:

The NRC (Nuclear Regulatory Commission) cannot lose its primary focus: the protection of public safety, even regarding the decision to relicense existing plants to extend operation.

The unique set of circumstances regarding Oyster Creek would place the public in jeopardy if allowed to continue operation. Kindly remind the NRC of its primary focus. Relicensing should be denied.

Sincerely,

*Russell W. Guyette*
