Subject: Comment on Second Clinton Nuclear Reactor

Dear NRC -- Re Docket No. 62-007-ESPand ASLBP No. 04-821-01-ESP:

The present nuclear reactor at Clinton wastes large amounts of its
energy heating the water in Clinton lake.

The nuclear waste stored on site is an active environmental and public
health danger, requiring careful management into the indefinite future
(many thousands of years).

The immense consumption of capital required by huge nuclear plants
threatens to choke off unquestionably more benign alternatives such as
wind energy.

For these and other reasons I urge you not to issue an Early Site
Permit for Exelon's
proposed second nuclear power plant at Clinton IL

John B. Gilpin
