Dear Ms. Joustra,

Pursuant to our conversation earlier today, please note the following:

Mr. James Guenther did not take the Hazmat Driver Qualifications refresher, as required under 48 CFR 172 Subpart H, on November 11, 2006. As indicated to you at the time of your visit, our firm, EGS Associates, Inc. is in the process of merging with a larger firm. The merger is expected to occur by December 15, 2006 and the nuclear densometers will be transferred to the main firm upon obtaining its NRC license. Should Mr. Guenther continue as an employee of the larger group, he will be required to take the transportation training refresher. At this time EGS is not involved, or projected to be involved, in projects requiring the use of nuclear densometers prior to the anticipated date of the merger. Should an occasion for their use occur in the interim, I will personally transport and operate the gauges.

During transportation of a nuclear gauge, the revised Bill of Lading and emergency response information sheet will be kept within view or within reach of the driver. If a driver leaves the vehicle, the shipping paper will be left on the driver's seat or in a pocket on the driver's door.

Please contact us if you have any questions or require additional information.

Sincerely,  
Paul Echaniz, P.E.  
President  
EGS Associates, Inc.
