Subject: Spill of souldions 11/22/06 - Docket 40-8964

Mr. Steve Ingle,

I am reporting a spill that occurred this morning (November 22, 2006) at approximately 9:30 A.M. A spill of approximately 2100 gallons of Mine Waste Water occurred in conjunction with a possible failure of a clean-out line in Wellfield 3. The failure is believed to have come from a buried fused 6" polyline joint. The spill is located in SE1/4 SW1/4, Section 26, T. 36 N., R. 74 W. The spill didn't enter the waters of the State. Soil samples have been collected and a gamma survey was conducted over the area. The line was taken out of service when the problem was discovered and will remain out of service until repaired. A full report will follow with in the required seven (7) working days of this notice.

Regards,

John McCarthy
