The Radiation Safety officer
UPMC Shadyside Hospital
Pittsburgh PA-15232

Fang Li is a medical physicist working in radiation oncology department. She came to us after an MS degree in medical physics from Columbia University. There she had fulfilled all the requirements for the handling of radioactive isotopes. She is working with us for over two years now and I am happy to attest that

1. During Fang Li's year of full-time training and year of supervised work experience, she has received training in the following items,
 - (a) Performing sealed source leak tests and inventories;
 - (b) Performing decay corrections;
 - (c) Performing full calibration and periodic spot checks of the remote after loading unit;
 - (d) Conducting radiation surveys around the remote after loading unit.

2. "Fang Li has satisfactorily completed the requirements in 10 CFR 35.51 paragraphs (b)(1) and (c), and has achieved a level of competency sufficient to function independently as an authorized medical physicist for high dose rate remote after loading unit."

She is very competent and pleasant colleague and I have no hesitation in recommending her for adding to our NRC license.

Sincerely,

Krishna Komanduri
