Subject: Cook Unit 2 - Amendment re. Turbine Control System Fluid Oil Pressure (**TAC MD3161**)

Bob:

We are reviewing your 9/15/06 application for amendment. One of our reviewers, Carl Schulten, has provided the following draft RAI. Please call me to set up a conference call to discuss Carl's comments in the next paragraph.

You may need to revise the application to address the NRC staff setpoint issue related to 50.36(c)(ii)(A) as discussed in RIS 2006-17 (Accession No. ML051810077). Model footnotes for setpoints related to the RIS discussion of LSSS are contained in the Hiland letter dated September 7, 2005 (Accession No. ML052500004). Another source of model footnotes is recent license amendments. More recently, the industry submitted model TS to address the LSSS issue in Revision 1 to TSTF-493, "Clarify Applcation of Setpoint METHodology for LSSS Functions." This traveler is currently under review.

The sole purpose of this e-mail is to prepare you and others for the proposed conference call. It does not formally convey an NRC staff position, and it does not formally request for additional information.

Peter S. Tam, Senior Project Manager
Plant Licensing Branch III-1
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
