Orysia -

Sorry for not providing an earlier response. Staff have reviewed the attachments to your email below and concur with the conclusions of NRC that, from our perspective, the documents appear to be complete and contain necessary information for termination of the Fort McClellan license. There is one correction on the first page of the "License Termination" - that is the words "Alabama Department of Radiological Safety" are incorrect. The correct wording is "Alabama Office of Radiation Control".

Equally, it has been our pleasure in working with you over these years on this project. I want to thank you and Terry Williams of our staff for the work that both of you committed to this project. I mentioned to Terry several times about how impressed I was with your professionalism and dedication and for your cooperation with the staff of this office. That has been recognized and appreciated by all of us. NRC is fortunate to have a person as dedicated as you. I commend you on a job well done. Don't ever forget NORM (you know who NORM is?)

Fort McClellan Environmental
Assessment

Mr. Whatley-

Attached is the Fort McClellan Environmental Assessment. Please let me know if you have any comments so that I can incorporate them into the EA. As soon as I hear from you, we will publish the EA and terminate the Fort McClellan license. I have also attached an evaluation memo that describes the work done in support of license termination.

I have enjoyed working with you and your staff. It has been a pleasure and a learning experience for me. Thank you for all your help.
