Re: Radioactive Material License 42-32507-01

To Whom It May Concern:

The current shareholders of PetroChem Inspection Services are contemplating the sale of all the outstanding capital stock to TÜV SUD America on or before Tuesday, December 12, 2006. As a result of the sale, we do not anticipate a change in the name of the corporation or a change in the corporate entity.

We **do not** plan any changes for the following areas of the present program:

- In the personnel or duties related to the licensed program (including Radiation Safety Officer)
- In the organizational structure, location, facilities, equipment or procedures related to the licensed program
- In the decommissioning of any facilities
- In the present procedure for granting and controlling access to radioactive material

The Surveillance program is to remain as it exists under our present license conditions.

The new shareholders of PetroChem Inspection Services will abide by all constraints, conditions, requirements and commitments described in the present program.

We would appreciate your approval of this transaction or an acknowledgement that approval is not required. Thank you for your consideration.

If you have any questions or require additional documentation, please contact me directly.

Sincerely,
