Alice,

Below are Tom's summary comments on the latest six (6) final status survey reports he has reviewed. In some cases, he was unable to complete the review due to lack of scan survey results or adequate summary results.

I would suggest that you plan on addressing these issues after we have clarified the calculations we need for the hot particle issue and you can provide supplemental information for these FSSs with the calculation.

John

**NOL-05:** The SPA-3 scan survey data or the data summary were not provided in Section 5.4 - *Survey Results*.

**OOL-07:** The SPA-3 scan survey data or the data summary were not provided in Section 5.4 - *Survey Results*. Attachment 3 includes survey logs which indicate that "no scan indications identified". The scan survey results need to be provided in terms of objective criteria specified in the LTP.

**OOL-09:** OK, but see comments on Conclusions. A summary of the soil sample results and the gamma scan survey results were provided. The *Conclusion Section* indicates that the soil sample summary meet the DCGLw criteria & that a retrospective power curve demonstrates that the number of soil samples taken were adequate to support the DQOs, but *Conclusions* section did not comment on the gamma scan survey results.

**SVC-01:** The SPA-3 scan survey data or data summary were not provided in Section 5.4 - *Survey Results*

**OOL-13 :** OK & The Survey Results section provides the direct measurements and ISOCS scan summary.

**OOL-16:** The SPA-3 scan survey data or data summary were not provided in Section 5.4 - *Survey Results*
