SUBJECT

Control No. 315817 -- Re - License Amendment request by letter dated October 27, 2006, to change the Radiation Safety Officer for License No. 21-25861-01, from Gregory Leverage to Daniel R. Rusiecki.

SUMMARY

In a telephone conversation with Mr. Rusiecki on this date, I explained that although he signed the amendment request naming himself as the replacement RSO and that the two attachments included a copy of his training certificate received from Troxler and a copy of their revised RSO duties and responsibilities which names him as the RSO, we also need a signed statement jointly signed by both him and a higher level of management acknowledging his designation as the replacement Radiation Safety Officer. Also, I requested a brief description of his portable gauge related activities since his receipt of the Troxler training.

Also, in accord with current NRC policy in support of security issues, we discussed the need for the licensee to specify a total possession limit, to be added to License Item 8 for each radioisotope (Cesium-137 and Americium-241) listed in License Item 6 of the subject license. I related that the possession limit did not have to be limited to their current total possession but could allow for temporary replacement gauge(s) and/or for planned expansions in gauge usage.

I also noted that there would be a modification to license Condition 18 to reflect additional physical controls to secure portable gauges, based on revisions to 10 CFR Part 30 (addition of paragraph 30.34(l) "Security requirements for portable gauges," as published in the Federal Register on January 12, 2005, with an effective date of July 11, 2005.

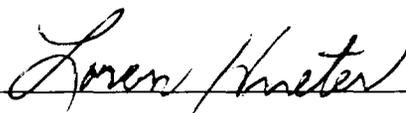

ACTION REQUIRED

The Licensee is to provide written response to three of the items related above, as requested, for our review/evaluation as additional information to Control No. 315817. Please provide response to me by facsimile (630-515-1259). No followup hard copy needed. If questions, please call me at 630-829-9829.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
