Subject: OC Drywell Inspection Info - Update

Paul & Mike,

Paul and I visited with Howie Ray and Pete Tamburo way back on August 9th. At that time they said they would mail me their inspection procedures and the status of their corrective actions from the CR on the inspection of the 5 bottles on the sandbed drains.

Since I hadn't received anything from them, I called Pete Tamburo yesterday to find out what was happening. He said they were ready to send the stuff out yesterday. There was a holdup because they just got the operations folks to start inspecting the bottles around August 1st. Pete was not happy with the information that was being recorded by the operators - felt it did not report what he wanted to know.

I should have the requested information late this week. Paul and I were going to meet next week and put together a plan on who would cover the OC inspection data review in October.

Regards,

Tim O'Hara
