Subject: AMENDMENT REQUEST

Dear Sirs:

The Eastern Virginia Medical School is requesting an amendment to its materials license. The proposed amendment includes the addition of two sources:

#	Nuclide	Source No.	Activity
1	Sr-90	EE-256	25 uCi
2	Sr-90	C4-422	100 uCi

The above items were produced by Isotope Products Laboratories – their data sheets are attached. The school will not own these sources, but we desire to use them at our facility. When they are present at our facility, we will ensure their proper storage and use as well as their compliance with our current radiation safety program.

When the use of the above two sources is no longer required, the school will request an amendment to its license to remove the sources.

If you have any questions or concerns regarding this request, please contact Courtney Kerr, Radiation Safety Officer and Director of Environmental Health and Safety at (757) 446-5103 or send email to kerrca@evms.edu.

Sincerely,

William Wasilenko, Ph.D.
Associate Dean of Research
