
MISCELLANEOUS CORRESPONDENCE

FOR THE FERMI RETAKE EXAMINATION - AUGUST 2006

June 16, 2006

Mr. Donald K. Cobb
Assistant Vice President
Nuclear Generation
Detroit Edison Company
6400 North Dixie Highway
Newport, MI 48166

SUBJECT: CONFIRMATION OF INITIAL OPERATOR LICENSE RE-TAKE EXAMINATION:
FERMI POWER PLANT, UNIT 2

Dear Mr. Cobb:

In a letter dated June 12, 2006, (Serial No. 06-0046), your staff requested we schedule an initial license operator examination on August 3, 2006. In a subsequent telephone conversation on June 13, 2006, between Mr. T. Haran, Supervisor, Nuclear Training, and Mr. M. Bielby, Senior Operations Engineer, arrangements were finalized for the administration of a written re-take operator examination for two license applicants who failed the written examination during the initial licensed operator examination administered during the month of March 2006. The requested examination has been scheduled to be administered during the week of August 8, 2006. In the unlikely event that we are unable to support the examination during the scheduled week, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

As agreed during the telephone conversation, your staff will develop the re-take written examination based on the guidelines in Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." Please inform us at your earliest opportunity if you discover you need to change the scheduled examination date.

To meet the above schedule, it will be necessary for your staff to furnish the examination outline during the week of June 19, 2006. The written examination and the supporting reference materials identified in Attachment 2 to ES-201 will be due to the chief examiner by July 5, 2006. Pursuant to 10 CFR 55.40(b)(3), of the Code of Federal Regulations, an authorized representative of the facility licensee shall approve the outline and written examination before they are submitted to the NRC for review and approval. All materials shall be complete and ready to use. We request that any personal, proprietary, sensitive unclassified, or safeguards information in your response be contained in a separate enclosure and appropriately marked. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examination to be rescheduled. The chief examiner (K. Walton) will contact the examination author via telephone with any requested examination modifications after the regional review of the examination is completed. The chief examiner will then be available in the region during the week of July 31, 2006, to review any requested changes and to complete validation of the proposed examination. Appendix E of

NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examination is being developed and administered.

To permit timely NRC review and evaluation, your staff should submit preliminary senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (OMB approval number 3150-0090) at least 30 days before the scheduled examination week. If the preliminary applications are not received at least 30 days before the examination date, a postponement of the examination may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018, which expires on June 30, 2006. The public reporting burden for this collection is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, D.C. 20503-0001.

The NRC may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. Haran has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. Keith Walton at (630) 829-9836, or me at (630) 829-9707.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA by Ann Marie Stone For/

August 2, 2006

Mr. Donald K. Cobb
Assistant Vice President
Nuclear Generation
Detroit Edison Company
6400 North Dixie Highway
Newport, MI 48166

SUBJECT: OPERATOR LICENSING EXAMINATION APPROVAL

Dear Mr. Cobb:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing retake examinations at the Fermi Power Plant.

The U. S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications in connection with this examination and will separately provide a list of approved applicants to Mr. Edwin F. Kokosky, Training Manager. Note that any examination waivers have been addressed in separate correspondence.

The NRC has approved the subject examinations and hereby authorizes you to administer the written examinations in accordance with Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," during the week of August 7, 2006.

Please contact Mr. Raymond Keith Walton at 630-829-9836, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read "Hironori Peterson", written over a horizontal line.
