Chief
Rules & Directives Branch Division of Administrative Services
U.S. Nuclear Regulatory Commission

4 Dec 2006

Dear Sirs,

This letter is in support of the planned expansion of Plant Vogtle in Burke County, GA. I am a resident of Savannah, employed as a biology teacher at St. Vincent's Academy, and currently serve as the vice-chair of the Citizen's Advisory Board of the Savannah River Site. The issues surrounding the commercial nuclear industry are complex, and often misrepresented by groups who play upon the public's fear of the unknown. While theoretical physics is undoubtedly difficult for most of us to comprehend, I am confident the design, construction, and operation will proceed with the utmost care for public safety. It behooves those involved to include risk management and public involvement in all their decisions.

Please include me in your list serve so I may stay apprised of the progress of the draft permit. The modernization of the commercial nuclear industry is vital to our economy and security. The development of multiple energy sources is the prudent solution to the current environmental and political challenges of our current energy dependence of oil and coal.

Respectfully,

Donna L. Antonucci
