SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE,
LICENSE NO. 35-32592-01

Dear Mr. White:

By letter dated October 31, 2006, you requested that the U.S. Nuclear Regulatory Commission terminate your NRC radioactive material license, License No. 35-32592-01, (expiration date of December 31, 2010). This license authorized fixed gauge usage at your facility located at Freeman Station, 700 E. Main, Freeman, Missouri. You provided information confirming the transfer of the only remaining gauge, covered by the referenced license, to another licensee, QSA Global, Inc., Baton Rouge, Louisiana, authorized to receive the source/gauge. You also provided a copy of the current leak test record, of the referenced sealed source, confirming its non leaking status and confirmed that no leaking sealed sources have ever been identified under the subject license, based on routine leak test data. Based on information you have provided to us, we have concluded that licensed material is no longer used or possessed under NRC License No. 35-32592-01, and that appropriate criteria have been met that permit us to terminate the license as requested. Accordingly, an amendment is enclosed terminating your NRC License No. 35-32592-01.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (The Public Electronic Reading Room).

Sincerely,

A handwritten signature in cursive script that reads "Loren J. Hueter".

Loren J. Hueter
