ATTN: Patric J. Mumma, MAJ, MSC  
Adjutant General  
Washington, DC 20012

Gentlemen:

Enclosed please find Amendment No. 49 to Material License No. 08-01738-02.

Please note that your license incorporates the use of NRC's Model ALARA Program contained in Appendix O of Regulatory Guide 10.8 (Rev. 1), copy enclosed. This action was taken because your request did not contain information concerning the ALARA program that you will follow.

As of August 15, 1980, our licensees were requested to submit an ALARA program with any significant amendment, renewal, or new byproduct material license application. If you wish to develop and submit an alternative ALARA program that is at least equivalent to the Model ALARA Program, your license may be amended accordingly.

An additional condition has been added to your license to cover disposal of radioactive materials via decay-in-storage methods.

Please read your license carefully so as to be familiar with all of its conditions.

Sincerely,

Doris J. Foster  
Material Licensing Branch  
Division of Fuel Cycle and  
Material Safety
