RE: ESP Environmental Scoping Comments for  
 nuclear Plant Vogtle

I am very concerned with Southern Nuclear's ESP application to build up to two more nuclear reactors at Plant Vogtle. I urge you to thoroughly evaluate the water and security issues that new reactors would pose to the Savannah River basin and surrounding communities. Energy efficiency and renewable energy supplies must also be reviewed as possible alternatives. Additionally, please address the following items as NRC staff develops the draft EIS:

1. Nuclear waste -- there's nowhere for it to go. Please do not add to the problem.
2. As estimated in the 1982 Congressional Report, meltdown could be catastrophic.
3. We need to decrease our power usage, and explore "alternative" sustainable sources of energy.

Sincerely,

Robyn Huer
