Mr. W. O. Miller
U. S. Atomic Energy Commission
Isotopes Branch
Division of Materials Licensing
Washington, D. C. 20545

Dear Mr. Miller:

Subject: U.S.R.C. License GL 122

We would like to request an amendment to our license GL 122 to include the Escape Slide Pull Handle as shown on the enclosed drawing LAB 758-II.

This unit is essentially the same as the LAB 758-II now included in the license except that it is shorter and the plexiglas part containing the tubes has been surrounded by an aluminum shell.

The tritium content per marker will be 0.8 curie. The units will be labelled in accordance with the provisions of our license and the same quality control procedures will be followed as for other items in this same category.

Very truly yours,

UNITED STATES RADIUM CORPORATION
