

December 20, 2006

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

Oyster Creek Generating Station
Facility Operating License No. DPR-16
NRC Docket No. 50-219

Subject: Notice of Intent to Pursue License Renewal – Exelon Generation Company, LLC

References: 1. NRC Regulatory Issue Summary 2003-02, "Importance of Giving NRC Advance Notice of Intent to Pursue License Renewal," dated February 3, 2003

2. Letter, November 14, 2005, Exelon Generation to U.S. Nuclear Regulatory Commission, Notice of Intent to Pursue License Renewal (ML053290027)

In Reference 1, the NRC describes the importance of providing advance notice of the intent to pursue license renewal. In Reference 2, Exelon Generation Company, LLC (EGC) informed the NRC of its planned dates for submittal of license renewal applications to the NRC. The purpose of this letter is to inform the NRC of changes to the previously provided schedule for submittal of license renewal applications.

As previously announced, EGC has decided to prepare a license renewal application for the Three Mile Island Unit 1 plant and plans to submit that application in the first quarter of 2008.

EGC plans to submit additional license renewal applications as follows:

One application in September 2011
One application in September 2012
Two applications in July 2013

These dates supersede the schedule information provided in Reference 2. EGC is not prepared at this time to announce the specific plants for these license renewal applications, and therefore requests that the NRC identify each of these plants as an "Unnamed Exelon Plant."

If you have any questions regarding this information, please contact me at 610-765-5958.

Respectfully,

Michael P. Gallagher
Vice President - License Renewal Projects
Exelon Generation Company, LLC
