MEMORANDUM TO: Douglas W. Weaver, Chief  
Guidance, Infrastructure, and Financial Review Branch  
Division of New Reactor Licensing  
Office of New Reactors

FROM: Patrick L. Hiland, Director /RA/  
Division of Engineering  
Office of Nuclear Reactor Regulation

SUBJECT: TRANSMITTAL OF STANDARD REVIEW PLAN NUREG-0800  
APPENDIX 7.1-D, "GUIDANCE FOR EVALUATION OF THE  
APPLICATION OF IEEE STD 7-4.3.2"

The purpose of this memorandum is to transmit NUREG-0800, Standard Review Plan (SRP), Appendix 7.1-D, "Guidance for Evaluation of the Application of IEEE Std 7-4.3.2." This document is technically complete, formatted in conformance with LIC-200, "Standard Review Plan Process," and is designated "publicly available."

In accordance with the staff requirements memorandum dated May 10, 2005, on the April 6, 2005 Commission meeting, the Office of New Reactors (NRO) and the Office of Nuclear Reactor Regulation (NRR) have written SRP Appendix 7.1-D (Enclosure). The information in this new section was previously provided in Appendix 7.1-C, Revision 4, dated June 1997. Additional changes are summarized on the last page of the SRP section.

In addition, this section has been administratively updated in accordance with NRR Office Instruction, LIC-200. The administrative update is comprised of assigning the review responsibilities by function, with the responsible organizations maintained separately from the SRP itself to minimize impacts of office reorganizations, and editorial and formatting changes.

The staff has determined that the changes do not involve any new staff positions. I understand, that most of the SRP sections will be issued as final versions without publishing them as draft and requesting comment. The staff is revising the SRP in this manner to provide a more up-to-date SRP in light of the requirement in 10 CFR 50.34(h) for an applicant to evaluate its facility against the SRP revision in effect six months before the docket date of the application.

CONTACT: Barry Marcus, EICB/DE/NRR  
301-415-2823

In addition, this memo and its enclosure will be made publicly available as a preliminary SRP section. It will be formally published following reconciliation against the ongoing Part 52 rulemaking and regulatory guide updates including Regulatory Guide 1.206, "Combined License Applications for Nuclear Power Plants (LWR Edition)." After formal issuance, the SRP will be available for public comment. Comment resolution will be addressed in subsequent SRP revisions. Prior to revision to individual sections, comment resolution may establish a basis for how alternatives to the NUREG-0800 acceptance criteria provide an acceptable method of complying with the NRC's regulations.

For questions concerning this document, please contact Barry Marcus Li at 301-415-2823.

Enclosure:  
As stated
