January 5, 2007

Docket No. 03002556
Control No. 139671

License No. 29-12664-01

John Barone
Vice President of Operations and Business Strategy
Christ Hospital
176 Palisade Avenue
Jersey City, NJ 07306

**SUBJECT: CHRIST HOSPITAL, VOIDANCE OF APPLICATION FOR LICENSE
AMENDMENT, CONTROL NO. 139671**

Dear Mr. Barone:

This concerns the subject application for an Amendment to your material license. As we discussed on January 5, 2007, because your request to authorize use of a high dose rate remote afterloader (HDR) unit does not contain all of the information necessary to complete our review and contains out-of-date information, we have voided your application. This action is taken without prejudice to the resubmission of your request.

Please submit a complete, up-to-date application which provides the following information:

1. Manufacturer, model number, radionuclide, and maximum possession limit for the HDR device(s) required.
2. Name and documentation of training and experience for all proposed authorized users in accordance with 10 CFR 35.690.
3. Name and documentation of training and experience for all proposed authorized medical physicists in accordance with 10 CFR 35.51.
4. Diagram of the HDR treatment room which depicts the location of the HDR unit when in use and in storage and which depicts surrounding areas (both restricted and unrestricted).
5. Shielding calculations for HDR treatment room.
6. Safety procedures, including emergency procedures for responding to an abnormal situation, as described in 10 CFR 35.610.
7. Periodic (i.e., daily) step-by-step spot-check procedures to be performed in accordance with 10 CFR 35.643

J. Barone
Christ Hospital

2

Thank you for your cooperation.

Sincerely,
