MEMORANDUM TO: SSD Case 07-15, International Isotopes

FROM: Nima Ashkeboussi **/RA/**
Source Safety and Security Branch, IMNS

SUBJECT: No Checklist Used

SSD Case 07-15 was an International Isotopes amendment to registration certificate NR-1235-S-103-S. The licensee requested that the dimensions of the registered sources be amended to include a range of possible source capsules. The licensee demonstrated that there is no change to the radiation profiles and that original prototype testing is valid for the requested change. The review did not require a checklist because the requested action has no effect on the safety of the source.
