Joseph M. Farley Nuclear Plant
Edwin I. Hatch Nuclear Plant
Vogtle Electric Generating Plant
Southern Nuclear Operating Company Reorganization

Ladies and Gentlemen:

Southern Nuclear Operating Company (SNC) has evaluated the benefits associated with changes to the organization structure and decided to move to a site vice president organizational structure. The evaluation included careful consideration of the licensing requirements and commitments of SNC as the licensed operator of the Joseph M. Farley Nuclear Plant, the Edwin I. Hatch Nuclear Plant, and the Vogtle Electric Generating Plant. The resulting structure is common in the nuclear industry and places a vice president at each plant site and eliminates the Project Vice President position at the corporate office.

In conjunction with this organizational structure change, the Southern Nuclear Board of Directors elected the following vice presidents who assumed the responsibilities below on January 2, 2007:

J. Randy Johnson – Vice President – Farley
Dennis R. Madison – Vice President – Hatch
Tom E. Tynan – Vice President – Vogtle

To facilitate implementation of the site vice president organizational structure, L. Mike Stinson will become Vice President, Fleet Operations Support reporting to me. In this position, Mike will be responsible for Nuclear Fleet Security and Emergency Preparedness, in conjunction with the responsibilities previously performed by the Fleet Support General Manager. The Fleet Support General Manager position is being eliminated.

Based on the above described changes, NRC correspondence to SNC should be provided to the respective plant vice president. The address for the respective vice president for each plant is enclosed. Accordingly, please revise the correspondence routine for SNC to reflect the above described changes.

If you have any questions, please advise.

Sincerely,

Jeffrey T. Gasser

JTG/TWS/daj
