Re: Oyster Creek Generating Station  
Facility Operating License No. DPR-16  
NRC Docket No. 50-219

Federal Consistency Certification for Oyster Creek Generating Station License  
Renewal Application

Ladies and Gentlemen:

This letter provides the certification of AmerGen Energy Company, LLC (AmerGen) to the U.S. Nuclear Regulatory Commission (NRC) and the State of New Jersey Department of Environmental Protection (NJDEP) that the proposed renewal of the NRC Operating License for the Oyster Creek Generating Station (OCGS) in Lacey Township, NJ, complies with the enforceable policies of the New Jersey Coastal Management Program, and that continued operation of OCGS will be conducted in a manner consistent with that Program. AmerGen requests that the State indicate its concurrence with the Certification.

The Certification includes a set of findings relating the coastal effects of continued operation of OCGS to the relevant policies and enforceable rules of the New Jersey Coastal Zone Management Program. Attachment 1 to the Certification reproduces each Program policy and rule and explains the basis for AmerGen's conclusion that renewal of the OCGS Operating License will comply, or that a particular policy or rule does not apply to the proposed license renewal. This includes a description of the application of the Basic Coastal Policies and the Basic Location Rule, which collectively require an assessment of the public interest. The assessment shows that renewal of the OCGS operating license is clearly in the public interest for many important reasons, including: maintaining an essential source of electricity generation within New Jersey vital to the welfare of all New Jersey; maintaining a substantial number of jobs for skilled workers; and providing a clean source of energy that does not generate carbon dioxide, nitrogen oxides, sulfur oxides and other contaminants that would be generated by the fossil fueled plants that would be required if this license is not renewed.
