Below is the result of your feedback form. It was submitted by

Mark Burzynski (Mark.Burzynski@areva.com) on Friday, December 15, 2006 at 15:30:15

Number_Title: DG-1142

comments: Regulatory Position 1 states that for environmental qualification of safety-related computer based I&C systems, type testing is the preferred method. The option to use other methods described in section 6.3 of IEEE 323-2003, with the appropriate technical justification, should be retained as acceptable methods to demonstrate qualification for equipment located in mild environments.
