

To Whom It May Concern:

This short comment is to support the AAPM's request for rulemaking. As a physicist certified by the ABR in 1977 and as a current trustee of the ABR I support the request. Under the current status many highly qualified ABR certified physicists cannot serve in roles for which they have been educated and tested. I also believe the current status does not reflect the actual intent of the NRC. If the current status is not changed many highly qualified physicists will not be able to fulfill roles they have historically filled. This will have a large negative effect on healthcare.

G. Donald Frey, Ph.D.
Certified Radiological Physicist
