Desc: The NRC requires an entity holding a license for a reactor that will close within 5 years or has already closed to file a Decommissioning Funding Status Report annually. See 10 CFR 50.75(f)(1). It is our understanding that most, if not all of the 2006 Decommissioning Funding Status Reports for the below reactors were filed, but were never released to the public because the required standard reviews were not completed. Please complete the standard reviews so that the reports can be released to the public as quickly as possible (the reports were likely filed nearly a year ago in March 2006). Once you have conducted the standard review and released the reports to the public, please provide us with the ADAMS accession numbers - we do not need hard copies.
