

January 11, 2007

Mr. Tom Kevern
U.S. Nuclear Regulatory Commission
11545 Rockville Pike
Rockville, MD 20852-2738

SUBJECT: AP-1000 Design-Centered Work Group
Input to Combined License Application Workshop

Enclosed please find ten (10) copies of a compact disc containing the AP1000 files for the NRC's Combined License Application workshop on February 2, 2007. This is advance material being provided to allow the NRC staff to familiarize themselves with the information that will be discussed in the meeting. The files on the enclosed discs include:

- Draft versions of COLA FSAR Chapters 10 and 15;
- Portions of the AP1000 Design Control Document;
- APP-GW-GLR-021, Rev 0 (TR06), AP1000 As-Built COL Information Items; and
- APP-GW-GLR-016, Rev. 0 (TR36), AP1000 Pressurizer Design.

These are draft and/or uncontrolled documents being provided for example only, to facilitate discussion of format and level of detail in an application; they are not being provided for technical review, and those that are drafts are subject to revision prior to formal submittal of AP1000 DCWG members' applications.

The latter two documents are provided to demonstrate the use of hyperlinks for the workshop. Please note that, in order for the hyperlinks to work properly, the files must be stored in the same directory structure as exists on the enclosed discs.

If you have any questions, please contact me at (980) 373-7820 or at psastings@duke-energy.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Peter S. Hastings'.

Peter S. Hastings, PE
AP-1000 Reference Plant Licensing Lead

cc: G. A. Zinke, NuStart Licensing Lead
J. L. Starefos, NRC/HQ
