Entergy	CONDITION REPORT	CR-JAF-2002-03020

Originator: Naum,Christopher J **Originator Phone:** 6745

Originator Group: Fire Prot & Safety Supv **Operability Required:** N

Supervisor Name: Pechacek,Joseph A **Reportability Required:** N

Discovered Date: 08/13/2002 07:30

Initiated Date: 08/13/2002 14:19

Condition Description:

An employee upon access the protected area from Main SEC., within the vicinity of warehouse # 4, observed two (2) small dead birds. The employee was concerned about potential infection issues based on recent west nile virus alerts in the media. Trending CR.

Immediate Action Description:

Nurse was contacted; B&G picked up the birds; Oswego County Health Dept. was consulted and advised the site to dispose of the birds (non-crow species). No health & safety issues are present as a result of this finding. County will log finding. No additional CA's required.

Suggested Action Description:

Discovered Date: 11/16/2006 13:33

Originator Phone: 6730

Operability Required: N

Reportability Required: Y

Initiated Date: 11/16/2006 13:38

Condition Description:

During the outage, some morning between ~10/9 and ~10/20, about 10 small birds were found dead at the base of the stack. The next morning, there were another 2 or three. They were all the same type and it was obvious that they flew into the stack at night while migrating.

Immediate Action Description:

None. Didn't know it required tracking or reporting. Found that NRC was requiring lists of birds found dead due to operation of the facility for the license renewal.

Suggested Action Description:

If this is an item requiring monitoring and tracking, personnel at the facility should be made aware of it.
