DOCKETED
USNRC

January 23, 2007 (4:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear NRC Secretary:

I am writing to ask that you approve the petition for rulemaking that would improve radiation protection standards at older nuclear reactors. The petition requests that you reconcile your generic environmental impact statement for nuclear power plant operating license renewal applications with current scientific understanding of the health risks of low-level radiation, including but not limited to those discussed in the National Academy of Sciences Health Risks From Exposure to Low Levels of Ionizing Radiation: Biological Effects of Ionizing Radiation (BEIR) VII Phase 2 Report.

There are many reasons why this petition makes sense, including the fact that harmful exposure levels for young children, fetuses, and women are far lower than your current standards, which are targeted at healthy young men. Please review your standards and keep all of our society safe from harm.

Thank you,
Mark Reynolds
