Lisle, IL 60532-4352

Dear Sir or Madam:

Hendricks Regional Health would like to amend its NRC Byproduct Materials License, Number 13-17082-01, to remove authorization of 10 CFR 35.300 uses. We have not performed any 35.300 authorized therapies in several years and do not anticipate performing any in the future. We affirm that we are currently not in possession of any therapeutic dosages of radioactive materials licensed under 35.300 or any associated wastes.

If there are any questions concerning this license amendment, please contact our nuclear medicine consultant, Mr. Patrick J. Byrne, DABR, CHP, at 877-317-5811.

Sincerely,

Stanley Metzger
Director of Radiology
Hendricks Regional Health
