Subject: Response to Request for Additional Information Concerning NRC License Termination Plan for Seneca Army Depot Activity Control Number 135163

Dear Mr. Kottan,

This is in reference to the letter dated September 7, 2005, regarding the license termination effort for Seneca Army Depot Activity. Since the use of Scenario B has been deemed inappropriate for the survey units and conditions at Seneca, the Army wishes to pursue the use of Scenario A, per license condition 15 and the *License Termination and License Release Plan*, in order to terminate License SUC-1275. To further discuss this matter, we would like to set up a conference call in the near future at your convenience.

Should you have any questions, please do not hesitate to contact me (607) 869-1309.

Sincerely,

Stephen M. Absolom
