Dear Sir or Madam:

I am Dr. Peter Blue and am the principle authorized user for NRC License Number 39-14873-01 at Moncrief Army Community Hospital, Fort Jackson, South Carolina.

As indicated by his ABR credentials along with those supporting signatures (enclosure), CPT Daniel A. Reidman has completed his preceptorship and has the experience and training in accordance with 10 CFR 35.190 and 10 CFR 35.290 for use of unsealed byproduct material for uptake, dilution, and excretion studies for which a written directive is not required (35.100) and for use of unsealed byproduct material for imaging and localization studies for which a written directive is not required (35.200). I am satisfied with his competencies in working with byproduct material.

Should you have additional questions, please contact Captain Gary L. Hall at (803) 751-4552/2207.

Sincerely,

  
Peter W. Blue, MD  
Chief, Nuclear Medicine

The preceding ABR forms do not have to be completed for a resident to take the ABR exam including the Nuclear Medicine section of the exam. Completing the form documents the training and allows the candidate to receive authorized user (AU)-eligible designation on his/her certificate.

Candidates who fulfill all the requirements listed on Form A and Form B and who pass all their ABR exams will receive an ABR certificate that contains the additional designation "AU-eligible". This means that the person is eligible through the ABR pathway to be approved by the NRC as an AU of medical radionuclides for imaging and localization studies and for oral administration of sodium iodide I-131 requiring a written directive ( $\leq 33\text{mCi}$ ). NRC approval is obtained upon written application to the NRC/Agreement State and also requires submission of an NRC preceptor form which has been completed and signed by the preceptor who must be an AU. The forms are available on the NRC website.
