Re- Request to receive Tc-99m MDP unit doses for Patient injection under USNRC License 29-30840-01

To whom it may concern

I refer to the above caption in which a request was made to this pharmacy for Tc-99m MDP unit doses for bone imaging. Regrettably, at this time the conditions of your Radioactive Materials License issued by the NRC, prohibits this us from acceding to your request for the following reasons.

- ❖ Tc-99m as stated in your License # 29-30840-01 is duly authorized under 10CFR 35.65 which allows you the Licensee to receive and posses such material **for use as calibration, transmission and reference sources only.**
- ❖ Your License specifically states in Para 4 (b) that **you need to request and obtain an amendment before you order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the License.**

An amendment to receive and possess material such as unit dose Tc-99m (MDP) should be **requested under 10CFR 35.200** -Use of byproduct material for imaging and localization studies for which a written directive is not required.

While this may have been an oversight or mis-interpretation of License conditions, Nuclear Diagnostic Products will be unable to supply you with such material until the appropriate amendment is obtained and a copy forwarded to us.

Any questions, please do not hesitate to contact me at (973) 664-9696.

Thank you
