Subject: Docket # PRM-51-11 Petition by Sally Shaw

DOCKETED
USNRC

February 5, 2007 (10:40am)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

I am writing to request that you act favorably on the above petition. The current "allowable levels" of radiation exposure are not protective enough for the public, especially for pregnant women, fetuses and children.

Please seriously consider adding inhaled and ingested radionuclides. Planned and accidental releases of all types should be included. Further, any and all types of excess radiation exposure from nuclear power and its' fuel cycle should be included and monitored.

Recent studies documenting that there is no safe level of radiation exposure coupled with the many planned and accidental releases (the extensive groundwater and river contamination in Northern Illinois spring to mind)provide compelling support for this petition.

Thank you for considering my comments. Jack Saye
