I, Crystal Harris, have requested that Chuck Parke be named as the temporary RSO for License No. 13-24550-01. The named RSO, Gene Sinclair, for license no. 13-24550-01 has passed and can no longer take on the duty of RSO. Alan Crose will be the new RSO once he completes the Ohmart Radiation Safety Officer training on February 26, 2007- March 2, 2007. A follow up amendment will be requested once Al has completed the training.

Chuck Parke is currently the RSO for Cargill in Sidney, OH for Material License No. 31200760000. Chuck's training includes working in and around such devices at the Sidney, OH plant for 25 years. He's worked with previous RSO's on the testing of the sources, appropriate lockout procedures, and basic regulatory issues. His training has consisted of how the source is put together, power of the source, beam directions, lockout procedures, and shutter operation. Mr. Parke has gained strong knowledge of the proper operation of these devices as an operator and currently a crewleader.

Chuck will only perform the duty of leak testing. Any servicing or use of film badges would only be done by an Ohmart representative. Chuck Parke understands lockout procedures and personnel at the plant are trained on lockout procedures as well.

Thanks,

Crystal Harris
