Dear Dr. Siddiqui:

This refers to your application dated November 6, 2006, for a new NRC medical byproduct license. The application was deficient in several areas including the area of the training and experience submitted to qualify you as an authorized user and radiation safety officer. This reviewer discussed the deficiencies with your representative on December 13, 2006, and additional information was requested at that time. You responded to this request in your letter dated January 22, 2007. There remains only one unresolved issue, the information provided to support your training and experience is not sufficient to list you as an authorized user.

To assist you in providing the appropriate information needed to qualify you as authorized user, please complete the enclosed NRC 313A(AUD) form which has been marked for your convenience. Also review the enclosed regulations that apply to your request, 10 CFR 35.290(c)(1) & (c)(2) "Training for imaging and localization studies" and 10 CFR 35.59 "Recentness of training".

We have voided your request for a NRC medical license. This action is without prejudice to resubmission. When you resubmit your request, please state that is additional information to Control Number 315828 and fax the resubmission to (630) 515-1078. This status of your license request was discussed with Mark Dater on February 2, 2007, and this letter was sent to you by facsimile on February 5, 2007.

If you have any questions or require clarification on any of the information stated above, you may contact me at (630) 829-9842.

Sincerely,

A handwritten signature in cursive script that reads "Toye L. Simmons".

Toye L. Simmons
