Perry,

I wanted to give you an update on where we are at addressing the fluence question for Pilgrim. Right now we are considering modifying the LRA to reflect the following:

The BWRVIP Integrated Surveillance Program (BWRVIP Reports 86-A, 102, 116 and 135), as approved by the NRC, will be used to adjust projected RTNDT values as additional surveillance capsule results are collected. Pilgrim will submit additional P-T curves prior to the period of extended operation.

Additional Regulatory Comment

Pilgrim will submit fluence values and updated P-T curves to the NRC for approval prior to the period of extended operation.

Due: June 8, 2010
