Docket No. 70-7004-M

January 8, 2007

To Whom It May Concern:

USEC has been very supportive of our community. They have provided high paying jobs for county and the surrounding counties for many years.

The prospect of having the American Centrifuge here at Piketon is very much supported by the community. We are under the impression that we will have the most advanced centrifuge technology for uranium enrichment here in Pike County.

As I meet with potential residents that may either be visiting or contemplating relocating here, it is a very positive when the various employers are mentioned and that USEC is the top employer referred to in our area.

USEC has played a big role in helping me promote our County through my tourism efforts as well as making our economic future a positive one.

I think everyone is concerned with rumors referring to our county as becoming a potential waste dump site. Most all the residents would be concerned if this were the case, but at this time I have not seen anything that is actually supporting these rumors.

Today we need to focus on our part in providing America's electricity needs. Uranium enrichment is vital for us in order not to become so dependent on other countries for our supply of nuclear fuel.

We have worked well with USEC through the years and I hope to continue to have a positive relationship with them in the future.

Sincerely,

Sharon Manson
Executive Director-PCCVB
