Subject: Recent Inspection request for information

Dear Gary,

Thank you for your support of our groundwater contamination inspection activities during the week of November 13th. At that time, we were shown site characterization plume and water gradient maps that were in draft form. Please provide final electronic versions when available. In addition, our hydrology staff was not able to review any data relative to the recent pump test of recovery well no. 1. Please provide this information for our review by December 6th, if possible. Thank you for your assistance in this matter.

Regards,

Jim
