Tim:

I will communicate with Mr. Bowman (USNRC, on-site resident inspector) on the IPEC proposed actions to deliver the State observed sampling of the offsite USGS wells to him directly, for NRC analysis purposes, with the appropriate Chain of Custody and Tamper Proof seals attached.

Thanks,

Ron Sachatello

Ron,
That transfer process should be acceptable. I'll leave it up to the NRC to make the final call.
Tim

Tim:

Thanks for the update.

We have the USGS sample bottles in our possession now, and will have them with us for: you, the NRC, and IPEC when we meet with you on the USGS wells sampling sites.

We also understand Alex will be handing over the NRC bottles to us, for us to take the NRC split bottles back to the onsite IPEC NRC inspector. We will have the appropriate chain of custody seals to accommodate this.

Thanks,

B141

Ron Sachatello

I just spoke with John White and NRC has changed their minds on the USGS wells. Originally they were not going to ask for splits. However, he has now asked that DEC observe and take custody of splits from all of the wells for them, and turn them over to the resident inspectors at the site.

So, we now need bottles from the site for three-way splits for all of the USGS Wells and C-of-C's for transfer to the NRC, and Alex will have to arrange to hand over their splits before coming back to Albany.
Thanks,
Tim
